

THREESSHA D

AI & Data Science | Generative AI | Machine Learning | LLMs | NLP | Computer Vision | Full-Stack AI
Vellore, Tamil Nadu, India | +91 8946053762 | threesshad@gmail.com | linkedin.com/in/threesshad | github.com/threesshad-cpu

PROFESSIONAL SUMMARY

B.Tech AI & Data Science student with internship experience in Generative AI, software engineering, web intelligence, and astronomy R&D. Builds end-to-end AI systems across ML, deep learning, NLP, LLM applications, computer vision, digital twins, smart agriculture, and automated AI evaluation using Python, TensorFlow, scikit-learn, React, Node.js, SQL/SQLite, Streamlit, and Git/GitHub.

EDUCATION

C. Abdul Hakeem College of Engineering & Technology | B.Tech, Artificial Intelligence and Data Science | Aug 2023 - Aug 2027 |
Vellore, Tamil Nadu

CGPA: 8.38

TECHNICAL SKILLS

Programming: Python, JavaScript, SQL

AI / ML: Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI, LLMs, AI Agents

Frameworks: TensorFlow, TensorFlow Hub, scikit-learn, NumPy, PIL, React, Vite, Node.js, Express, FastAPI, Streamlit, Three.js

Engineering: Data Processing, Data Analysis, SQLite, REST APIs, Automated Testing, CI/CD, Git, GitHub, Docker, AI Evaluation, Benchmark Engineering

Domains: Digital Twins, Intelligent Systems, Misinformation Detection, Web Intelligence

EXPERIENCE

IARRD - Indian Astronomy Rocket Research and Development | Astronomy Team | Sep 2025 - Jun 2026 | Chennai

Prodigy InfoTech | Generative AI Engineer Intern | Dec 2025 - Jan 2026 | Mumbai, India

- Developed Neural Style Nexus, a real-time neural style transfer application using a pre-trained Magenta Arbitrary Image Stylization model, TensorFlow Hub, NumPy, PIL, and Streamlit.
- Implemented single-pass stylization with configurable style intensity and deployed the application to Streamlit Cloud.

SkillCraft Technology | Software Engineer Intern | Dec 2025 - Jan 2026 | Mumbai

- Developed a real-time web intelligence engine for e-commerce product extraction; automated capture of live web nodes into structured CSV outputs.
- Built box-plot analysis for market trends and price outliers and improved browser-automation stability through asynchronous event-loop management.

Strydo Technologies | Full-stack Development | Jun 2025 - Jul 2025 | Vellore, Tamil Nadu

PROJECTS

Agri-Neural Twin | Generative AI + Digital Twin for Tamil Nadu Agriculture | GitHub: threesshad-cpu/nimirndhunil

- Built an agricultural intelligence and risk platform combining historical data, neural simulations, geospatial analysis, and what-if forecasting for crop selection, market saturation, profitability, water usage, and climate risk.
- Designed a React 19 + Vite interface spanning 38+ districts and simulation scenarios across 1,000 future seasons with farmer-first mobile support.

OptiFlow Digital Twin | Industrial AI / Digital Twin | GitHub: threesshad-cpu/optiflow-digital-twin

- Developed a factory digital-twin prototype with React, Node.js/Express, 3D visualization, AGV simulation, grid-based path planning, routing logic, battery-aware behavior, and operational monitoring.

Dynamo Data Querying & Databases | AI Benchmark / Evaluation Engineering | GitHub: threesshad-cpu/dynamo-1573c1a-data-querying-and-databases

- Engineered a Harbor/Terminal-Bench-style manufacturing data task with a reference solution and automated verifiers covering BOM explosion, resource constraints, substitutions, lot sizing, scrap rounding, tie-breaking, state propagation, and edge cases.
- Iteratively debugged CI/evaluation failures and calibrated task difficulty using agent trials, timeout tuning, and mutation-sensitive tests.

Astronomical Image Processing | Computer Vision / Image Processing | GitHub: threesshad-cpu/iarrd-project

- Built a browser-side pipeline for astronomical images using grayscale conversion, Gaussian filtering, normalization, bright-spot detection, feature extraction, and JSON export; designed for future CNN inference and FITS support.

LLM for Misinformation Research | AI Research / NLP | GitHub: threesshad-cpu/LLM-for-misinformation-research

- Curated research on LLM-based misinformation detection, fact verification, multimodal LLMs, tool-augmented reasoning, credibility signals, and evidence-aware approaches.

CERTIFICATIONS
